CREATION OF DELICIOUS AND NUTRITIOUS, PROTEIN ENRICHED THIN-CRISP COOKIES

Challenge: Our customer, a leading global manufacturer of baked goods saw huge market potential for protein enriched baked goods and decided to enter this market by launching a thin-crisp cookie that met consumers’ needs for plant protein inclusions and optimized nutrition.

Solution: ADM’s cross-functional technical team responded to the customer’s need by developing a delicious thin-crisp cookie, nutritionally enriched with our MaxFlex™ PR System. This cookie features an expertly designed pea and rice protein blend to bring the consumer more plant-positive ingredients, and delivers an additional 6g of protein, all while maintaining a rich flavor and familiar texture.

Result: The customer was impressed by the product quality, the optimized nutritional value and the great taste. They successfully launched this new functional product within six months utilizing our MaxFlex™ PR System.

Concept Highlights

- 6g of plant-based protein per 36g serving* (3 cookies)
- Improved nutritional profile (from control): 8g fat, 135mg sodium per 36g serving*
- Gluten-free
- Natural flavors

*Typical crispy cookies contains 2g protein, 9g fat, 140mg sodium per 36g of serving.
